

Core Capabilities

AST provides comprehensive and integrated services to our clients including:

- ☆ Systems engineering and integration
- ☆ Live-Virtual-Constructive (LVC) training domain support
- ☆ Conduct of simulation driven exercises and analytical studies pertaining to combat operations and homeland defense
- ☆ Multi-Service Systems Training Aids, Devices, Simulators, and Simulations (TADSS) development and support services
- ☆ Combat Training Center (CTC) range operations infrastructure support including construction, refurbishment, and deconstruction of communication towers and supporting equipment, antenna installation, communications cabling, and fiber optic backbone upgrades

Past Performance/Experience

- Have been supporting PEO STRI systems since 1992 prior to establishment of STRICOM in 1994
- Possess extensive qualifications and past performance in model-based studies and analyses of military weapon systems and processes - specifically:
 - TRADOC Analysis Centers (TRAC) Leavenworth and White Sands Missile Range
- Provided training and technical support for:
 - Air Force: AWACS
 - Navy: NETPDTIC, NAWCTSD
 - Army: ARNG DBSP, CECOM, SOCOM, FORSCOM/USARC MCTCs
- Provided software development support for FAMSIMs, CCTT, GCTT, EPiCS, OneSAF, Combat XXI, and WARSIM

Differentiators

- SBA Certified Historically Underutilized Business Zone (HUBZone) and Service-Disabled Veteran-Owned Small Business (SDVOSB)
- Headquartered in Lawton, OK
- Southeast Regional Office (Orlando, FL) supporting PEO-STRICOM in LVC training domains for over 29 years
- 39 + years combined support to Department of Defense (DoD) as a Prime and Subcontractor
- Small Business under NAICS listed below
- Defense Contract Audit Agency (DCAA) compliant cost accounting system

About AST

Advanced Systems Technology, Inc. (AST) delivers valued services to Department of Defense (DOD) customers in support of their most critical missions. With over 39 years of experience, AST provides training, training aids, devices, simulators and simulations (TADSS) support as well as the related logistics, range operations and infrastructure support to DOD agencies. Our capabilities extend beyond the training domain to those necessary to effectively develop, deploy, and provide fielded systems support to meet modern warfighter requirements.

Pertinent Data

- Socio-Economic:

- UEID: NL2HVM3GT741
- Cage Code: 3J515
- Primary NAICS: 333310, 518210, 541330, 541511, 541512, 541513, 541519, 541990, 561210, 611430
- Registered with the System for Award Management (SAM)

Contracts

- **PRIME:** CTC Towers Replacement and Tech Refresh awarded by ACC Orlando. This effort is to replace existing Tactical Communications Towers and complete a Technical Refresh of additional towers at the JRTC, Fort Polk, LA and the JMRC, Hohenfels, Germany.
- **PRIME:** SeaPort Next Generation (SeaPort NxG) awarded by the Naval Surface Warfare Center – Dahlgren Division for Naval Sea Systems Command (NAVSEA). SeaPort-NxG is a 10 year, MA/IDIQ.
- **SUB:** National Training Center Training Support Contract (NTCTSC) via V2X, Inc. The NTCTS contract provides mission support for training operations at the NTC providing advisory services, technical expertise and systems operators. Providing Training and Analysis Feedback Facility (TAFF) support in the Wolf and Tarantula TAFF's.
- **SUB:** Fires Centers of Excellence (FCoE) via Yorktown Systems Group. Thirteen (13) task orders in support of the Fires Center of Excellence; all commands on Fort Sill, Oklahoma; and Army Futures Command, to develop and produce training strategies, doctrine, concepts, instruction and products for the current and future force.
- **SUB:** Training Support Systems - Enterprise II (TSS-E) via Valiant Integrated Services, which is to provide policy and resources to develop, deliver, and enable an operationally relevant and totally integrated Live, Virtual, Constructive (LVC) training environment for Warfighters through the Army's TSS-E products, services, and facilities worldwide.
- **SUB:** Mission Training Complex Capabilities Support (MTCCS) via General Dynamics Information Technology (GDIT). MTCCS provides simulation and training support, including live, virtual, constructive and first - person gaming exercises and logistical and administrative services for designated mission training complexes (MTCs).
- **SUB:** Enterprise Training Support Contract (ETSC) via our large business partner PAE and our small business partner ECS. Providing education, training, and knowledge based services in support of the U.S. Army and its Security Cooperation (International) mission.
- **SUB:** DoD Information Analysis Center (IAC), Multiple Award Contracts (MAC) via Battelle for Research and Development (R&D) solutions and support across the Federal Government. IAC MAC encompasses Research, Development, Test and Evaluation (RDT&E) and other R&D related analytical services to provide state-of-the-art solutions and emerging technologies in the areas of defense weapon systems, information technology, cybersecurity, C4ISR, and homeland defense. This work is being performed in two pools: Pool 1 - All Technical Support Areas except CBRN Labs (Full & Open), and Pool 3 - CBRN Labs.
